

Agnes Kay + Stemmer

Agnes is a popular collection of designs made from solid oak or walnut, with veneered shelves. Each piece in the collection comes out of the box as solid one piece items, with no assembly required. The design has the hallmarks of classical furniture-making training; details include radius edges, a gentle upwards taper and perfect proportion. The collection is comprised of high and long shelving units, a side and coffee table, console table and a mirror.

Made in the EU.
