

Agnes Kay + Stemmer

Design duo, Kay + Stemmer have designed a freestanding shelving unit called Agnes. The shelves come fully assembled and have the hallmarks of classical training; details include radius edges, a gentle upwards taper and perfect proportion. The result is a notably softened looking shelving range, free standing with poise and a sense of visual balance. The Agnes shelves come as a variety of freestanding or wall mounted shelving or a side table. Available in oak or walnut.

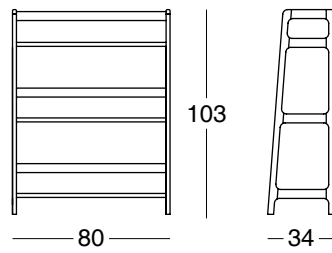

Made in the EU.
