

Bulb Reiko Kaneko

A new Bulb shaped vase addition to the Terracotta collection. This design suggests gestures and is particularly pleasing to touch. It has a bulbous bottom section with a round flat top section, which allows it to be lifted up and moved around much like a plate. Notably stable, the design has an internal glaze that gently highlights the fine ridge lines of the clay.

Made from terracotta and finished with an opaque glaze on the inside, which makes the vessel watertight.

Made by hand in Suffolk, England.
